1.0 HISTORICAL DOCUMENTATION OF MILL

1.1 HISTORICAL SUMMARY OF PACIFIC MILL

The Pacific Mill was located about three-fourths of a mile northwest of Devils Gate in Gold Canyon (Ansari 1989:52). Land, Skae, & Company built the 72 by 100 foot mill in 1864 near the Pioneer foundry for \$75,000 (Browne 1868:352). The mill had 40 stamps and a capacity of 40 tons per day (Ansari 1989:52; Science Applications Company [SAIC] 1993: 229).

In early 1865, in which year the mill appears on Hochholzer's map (Figure 1), the Pacific had six batteries, a 120 horsepower engine, 30 stamps, and 15 Wheeler pans and was processing 50 tons of ore per day for the Chollar mill. The mill used nine cords of wood per day and employed 20 men. It was the biggest mill in the district at that time (*Gold Hill Daily News* 1865a:3, Ansari 1989:52). In August 1865, the Alpha Company purchased the mill (*Gold Hill Daily News* 1865b:3). In 1866, the mill, owned by Sharon & Company with an assessed value of \$45,600, had 30 650-pound stamps, 15 pans, a daily capacity of 50 tons per day, and was powered by an 80 horsepower engine that used 8 cords of wood a day at a cost of \$14 per cord. The stamps dropped 10 inches and 72 times per minute (SAIC 1993: 229, Browne 1868:352). In 1868, the mill got a new engine. Later that year, Charley McWilliams served as superintendent (*Territorial Enterprise* 1868a:3; *Territorial Enterprise* 1868b:3).

In the early 1870s, the mill, with its 30 stamps and 70 ton-per-day capacity, processed ore from the Belcher Mine (Ansari 1989:52). In 1875, the Union Mill & Mining Co. owned the Pacific Mill. William Sharon was president of the company (Ansari 1989:52). In 1877, the mill was recorded on Wheeler's map (Figure 2). In 1878, the mill, supervised by Mr. Gray, processed Justine Mine ore (*Territorial Enterprise* 1878:3). In 1879, the mill was again recorded on Wheeler's map (Figure 3).

The following tables contain the full title history of the Pacific Mill (SAIA TSC 1993:234-239).

PACIFIC MILL SITE

2.0 IDENTIFICATION OF MILL SITE LOCATIONS

2.1 INFORMATION REPORT

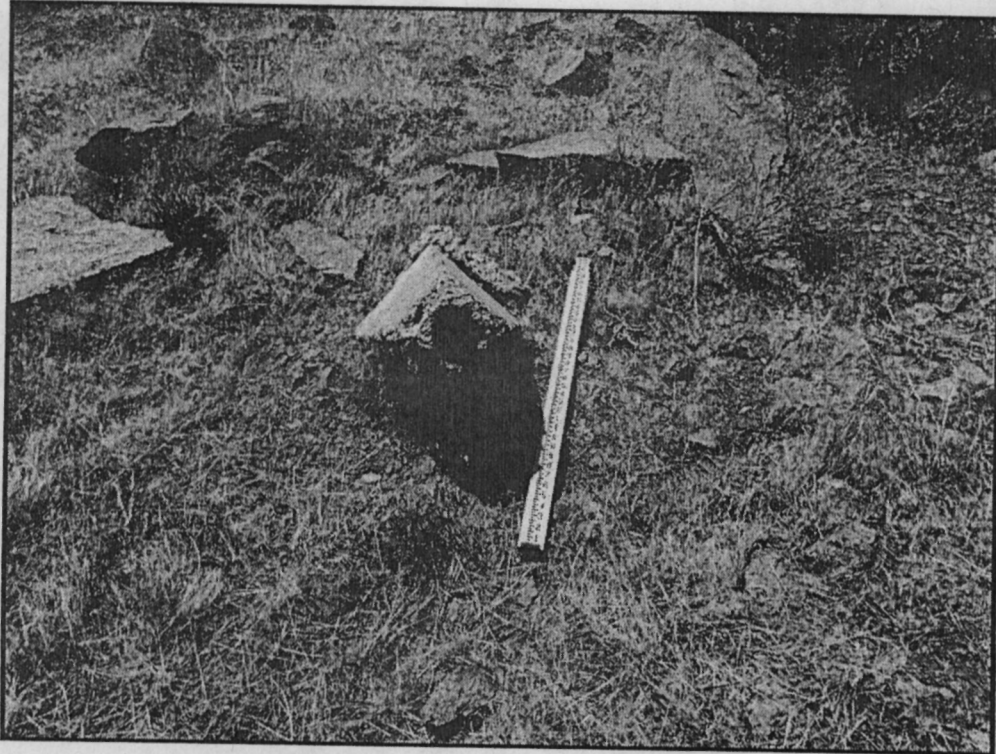

Appendix A is an information report generated from the NDEP Mill Site Inventory Database. This inventory is used to record survey data and historical research.

2.2 IMACS FORM

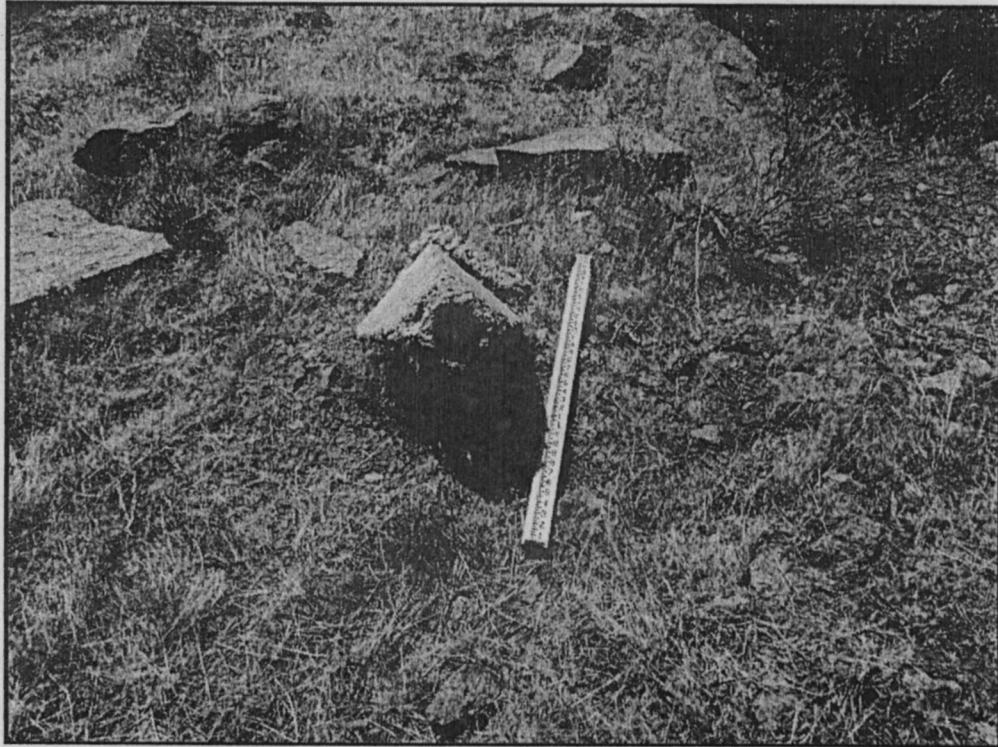

The Intermountain Antiquities Computer System (IMACS) Form is utilized by archaeologists as a guide for preliminary identification of a historic sites and features. The IMACS form is not intended to be complete, or to exhaust the subject of historic artifact discovery. The level of analysis may not adequately encompass the nature and complexity of the site. Estimates of numbers of various artifact types may be more appropriate for large sites rather than detailed descriptions which are more appropriate to small sites. The specific artifact classes represented here are the most common found on historic sites and are generally the most diagnostic. Evaluations of any site are dependent on surface features and artifacts, as well as complimentary historical documentation.

The IMACS form is a stand-alone document, attached as Appendix B with applicable attachments.

Historic Basis in Mill Survey

Depth of Cultural Fill:

(E) Fill noted but exact depth unknown

9. Site Description:

The Pacific Mill site is located off of State Route 342, also known as S Main Street in Gold Hill. The site is located west of Devil's Gate.

Nothing remains, either structural or artifactual, of the mill.

National Register Justification:

Ineligible

Eligibility Description:

The Pacific Mill Site is considered ineligible for the National Historic Register, and for inclusion in the Comstock Historic District.

The historic background would indicate that it would be potentially eligible under Criterion A; the mill was constructed in 1864 at considerable expense (\$75,000) and is a fine example of a large mill that exemplifies the Period 2: Comstock Fluctuations (1864-1872), and the last record of the mill is in 1879. The unique history of the mill and its role as a primary location for the exploitation of resources in the Comstock would support its eligibility under Criterion A. The mill was the biggest in the district at the time—in 1865. We recommend it is ineligible under Criterion B; even though there is known association with a several Comstock people, they are not significant people at the regional or national level. The physical components of this mill could also be considered to be eligible under Criterion C, as there would be considerable evidence of mining technology of the period present at the site, particularly as it contributes to the district as a whole, where it is a significant and distinguishable entity whose components may lack individual distinction. The integrity related to Criteria A and C are poor, however, and

Internal Site ID: 113

Appendix E

Eligibility: Unevaluated ___ Not Eligible ___ Criteria: A ___ B ___ C ___ D ___ By: _____ Concur: _____

NEVADA IMACS SITE FORM

compromise its eligibility under both criteria. Finally, nothing stands on the site today, and modern mining has likely eradicated all subsurface remains. Although buried deposits could support its eligibility under Criterion D, it is likely that these have been destroyed. The overall integrity of this site has been severely compromised.

2.21 Pacific Mill

The Pacific Mill, also known as the Alpha Mill, was located south of Gold Hill (B-2;A010546) (B-5;A010544) (B-6;A002004) (B-9;A002003) (B-11;A005065) (B-12;A002002) (B-12;A002002) (Photograph 4). The title history for the Pacific Millsite indicates that the mill was located on Lots 27 and 32, Block 6, Range C in the town of Gold Hill (Lots 27 and 32). The ground search indicated the Pacific Mill was located on lots 29 and 32. This corresponds with current Tax Assessor Parcel Nos. 02-141-01 and 02-141-11 (Map 3.2).

The millsite was originally surveyed for A.J. Tyrell on June 24, 1862, and consisted of 7.15 acres (W-1).

Collins' 1864 Directory described the Pacific Mill as erected by C. B. Land and Co., below the Pioneer foundry. The main building was 100 feet in length and 72 feet in breadth. "It runs 40 stamps together with pans sufficient to amalgamate 40 tons per day" (A-2;A008011).

The recorded title history for the Pacific Millsite begins with a deed dated March 21, 1864, whereby A. J. Tyrell conveyed 7.15 acres to Chauncey B. Land and John Leavitt (W-2). On June 11, 1864, John Leavitt conveyed to John Skae an undivided one-half interest in 7.15 acres of land (W-3). On the same day, Chauncey B. Land and John Skae conveyed an undivided one-fifth interest in the 7.15 acres to R. H. Rodgers (W-4).

The June 27, 1865 edition of the *Gold Hill News* states that the Pacific Mill was located about a mile below Gold Hill, that it was the largest in the district, that it was owned by Land, Skae and Company, and that it had 30 stamps and 15 pans and worked 50 tons of ore per day (B-14;A008573).

A land claim by Pacific Mill Company on August 12, 1865 was closely followed by a deed on August 21, 1865, by which Chauncey Land, John Skae, and Ralph H. Rodgers conveyed the "Pacific Mill Co." land in Gold Canyon to Alpha Gold Hill Mining Company for \$100,000 (W-5). Concurrently, a promissory note for \$88,000 was executed between the Alpha Gold Mining Company and Chauncey B. Land, Ralph H. Rodgers and John Skae (W-6). The loan had an interest rate of 1/4% and was to be paid monthly to the Bank of California in San Francisco, California (W-6).

The 1866 State Mineralogist Report describes the Pacific Mill as having 30 stamps, 15 pans, and a crushing capacity of 50 tons per day (A-3;A008519).

On October 15, 1866, Alpha Gold Hill Mining Company conveyed the Pacific Mill and land to William Sharon for \$60,788, the amount owed to John Skae and the Bank Of California (W-7). Evidently, the Board of Trustees of the Bank of California had passed a resolution that allowed John Skae and William Sharon to purchase the Pacific Mill from Alpha Gold Hill Company. John Skae then assigned to William Sharon all of his right and title to the mill and land in a contract of purchase (referred to in W-7). Alpha Gold Hill Mining Company apparently did not pay the promissory note, and the Pacific Mill was conveyed in a sheriff's deed to William Sharon in 1868 (copy not located). In the meantime, however, William Sharon quitclaimed an undivided one-half interest in the Pacific Mill and lot to

Charles H. Van Gorder on October 20, 1866 (W-8). William Sharon then conveyed a three-eighths interest in the Pacific Mill, and various interests in many other mills, to Union Mill and Mining Company on May 7, 1868 (W-9). On October 24, 1868, Charles H. Van Gorder quitclaimed an undivided one-half interest in the Pacific Mill and the land surveyed for the Pacific Mill Company, along with other property, to Union Mill and Mining Company (W-10). On October 28, 1878, Union Mill and Mining Company conveyed an undivided one-half interest in the Pacific Mill and lot to E. J. Baldwin (W-11). William Sharon signed this deed as president of Union Mill and Mining Company; James H. Dobinson signed it as secretary. The title search did not locate any later conveyance by Baldwin.

The 1871-72 State Mineralogist Report and Powell's 1876 *Land of Silver*, both describe the Pacific Mill as having 30 stamps and a capacity of 70 tons per day (A-4;A008456) (A-5;A005027).

A plat book in the Storey County Recorder's vault dated 1876-79 includes several notations for Lot 32, reading "Union M and M.C.," "See 27 6 C.," "C. C. Stevenson," and "Justice Mg Co" (W-12) (Map 18).

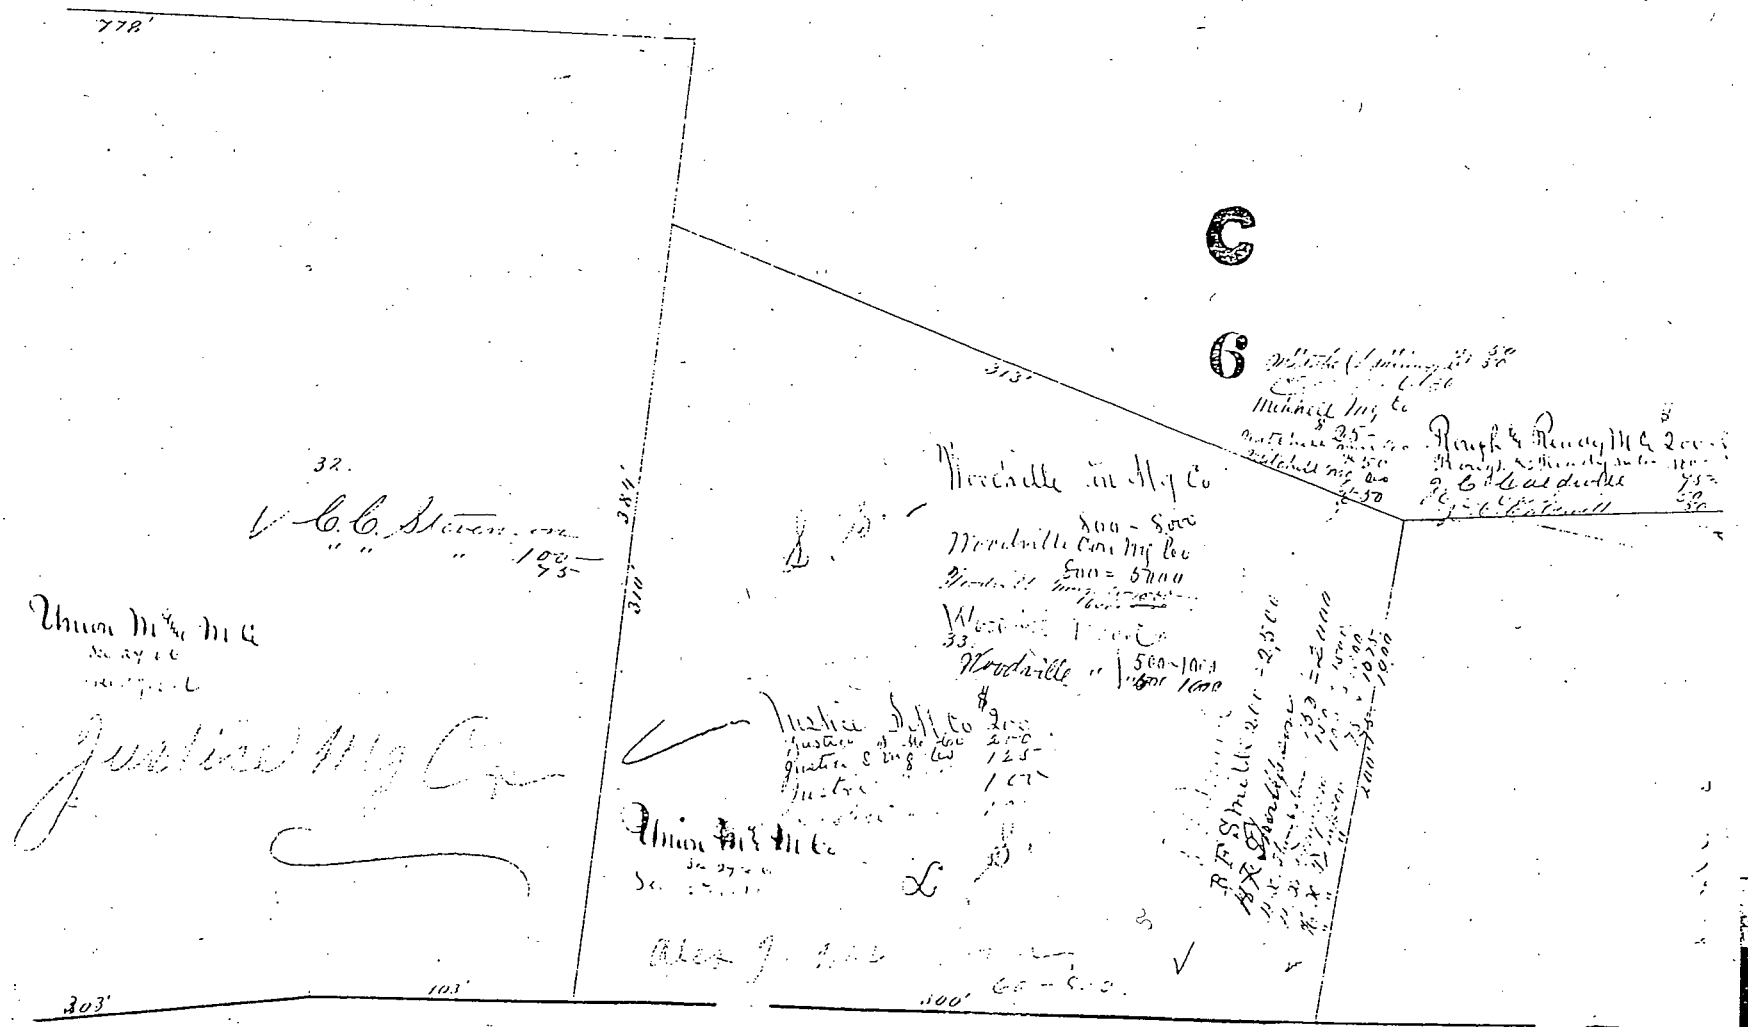

On April 9, 1885, William Sharon, President, and James H. Dobinson, Secretary, again signed a deed for Union Mill and Mining Company, conveying Lots 27 and 32, and the north 200 feet of Lots 29 and 33, Block 6, Range C, "known as the Pacific Mill property," to A. J. Morrison (W-13). A. J. Morrison conveyed the same property to Justice Mining Company on September 3, 1885 (W-14).

Fifty-six years later, on December 18, 1941, Justice Gold and Silver Mining Company conveyed Lots 27, 30-33, and the west 22 feet and north 200 feet of Lot 29, all in Block 6, Range C, to Dayton Consolidated Mines Company (Dayton Consolidated) (referred to in W-15). Dayton Consolidated subsequently defaulted on a deed of trust dated April 1, 1948, and Lots 27, 30-33 and a portion of Lot 29 were conveyed by First National Bank of Nevada, on behalf of Dayton Consolidated, to Dayton Inspiration Gold Corporation (W-15).

A series of unrecorded conveyances are referenced in a later deed (W-21). Dayton Inspiration leased the property to Rodney and Dickie De La Mare on December 1, 1968. Rodney and Dickie De La Mare then assigned the lease to Minerals Engineering Company (MECO), a Colorado corporation, on July 21, 1973 (W-21). Sometime after that, MECO assigned an interest in the 1968 lease to Western Gold Ventures, Ltd. (Western), a Colorado limited partnership, in which MECO acted as the general partner and Western acted as a limited partner (see W-21).

On January 7, 1977, MECO, "individually and as both a limited partner and the general partner of Western Gold Ventures, Ltd.," assigned its interest in the lease to Houston Oil and Minerals Corporation (Houston), for the benefit of Western, in accordance with an earlier option agreement (W-17) (W-18). In the assignment, MECO retained a "Carried Net Profits" interest (W-18).

On January 17, 1977, Dayton Inspiration and MECO amended the terms of the 1968 lease (see W-22).

On September 24, 1977, Dayton Inspiration forwarded to R. W. De La Mare a letter amendment to the 1968 lease (W-19). De La Mare disputed the assignment of the lease by MECO to Houston (W-20). This dispute was settled on March 21, 1978 when R. W. De La Mare and Houston executed a "Confirmation, Ratification and Amendment of Assignment of Mining Lease and Option" (W-21). After Dayton Inspiration and Houston amended the 1968 lease on July 1, 1978 (W-22), and MECO conveyed its remaining interest to Houston on July 12, 1978 (W-23), Dayton Inspiration conveyed Lots 27, 30-33 and part of Lot 29, and other property to Houston on March 1, 1979 (W-24).

Houston Oil and Minerals Corporation conveyed its interest in the property to Houston International Minerals Corporation on November 18, 1980 (W-25). Houston International Minerals Corporation then quitclaimed its interest in Lots 27, 30-33 back to R. W. De La Mare on August 5, 1982 (W-26).

In a memorandum of agreement dated January 16, 1987, R. W. De La Mare conveyed a 25% interest to Trans-Globe Resources, Inc., and a 25% interest to McCabe Enterprises, in all property he owned in Storey County (W-27).

A few months later, in a memorandum of agreement dated May 29, 1987, Rodney W. De La Mare, individually and as president of De La Mare Mines, Ltd., conveyed to Art Wilson an undivided 55% interest in all properties in which De La Mare had an interest, including parcel no. 02-121-01 (W-28).

In a quitclaim deed dated December 30, 1987, Rodney W. De La Mare, Art Wilson, and De La Mare Mines, Ltd. conveyed Lot 27 and other property to D. W. C. Lode Mines, Ltd. (W-29). On May 10, 1993, the Storey County Treasurer acquired the property for nonpayment of taxes (W-30).

Trade during the year 1866—Continued.

Soon will be 1,200 per month. †750 tons per month; October 15, 1866
†Now 2,800 tons.

NOTES ON MILLS.

STOREY COUNTY.

Bowers (1)—Paid this for 5 months only; has been idle four months; now running on own water; (2) 5-foot pans.

Central (1)—To Virginia and Gold Hill Water Companies; also, pays \$— per ton.

Company (2)—Heppburn and Paterson's, working 500 tons per month wet; four furnaces and barrels, working 170 tons dry.

Cryon Point (1)—Just dismantled; engine used to drain mine.

Comet (1)—Been idle for seven months; just started again.

Douglas (1)—10-inch cylinder, 30-inch stroke, 26 plain pans.

Empire No. 1 (1)—Increasing stamps to 21; capacity to be 40 tons per day; to employ 16 men, 27 Wakelee pans.

Empire No. 2 (1)—Concentrators and two stamps for breaking.

Empire State (1)—Atrocious pans.

Gold Belt (1)—6-foot tubs.

Hoover State (1)—With steam chambers.

Land's (3)—Throughout the table designates Blake's breakers.

Mammoth (1)—Also one prospecting stamp; (2) large.

Marysville (1)—30 5-foot plain pans.

Pacific (1)—Large.

Helaluna (1)—Stamps being increased to 16; capacity to 26 tons per day; men, wood to five cords; adding eight improved Wheeler pans, four settlers and one agitator.

Boyle (1)—8-foot settlers.

Rhode Island (1)—18-inch cylinder; (2) 7-foot pans.

Rigby's (1)—One extra pan and settler for tailings and one barrel.

Rogers's (1)—Not running for four months.

Saphire (1)—Wheeler.

Sincope (1)—Improved.

Stepenson (1)—8 1/2-inch cylinder; (2) Howland's rotary battery; can crush seven tons of amalgamated five tons per day; (3) small.

Succor (1)—24 Wakelee flat-bottomed pans.

Summit (1)—Burnt and rebuilt in 1883; (2) small pan and settler.

LYON COUNTY.

Birdsall (1)—Mill, \$110,000; ditch, \$40,000; total, \$150,000.

Carpenter (2)—Large-sized Wheeler.

Dayton No. 1 (1)—Four of these for prospecting; (2) 8-foot settlers; (3) Knox's battery.

Dayton No. 2 (1)—Two roasting furnaces.

Eastern Slope (1)—Large.

Eureka (1)—Break 80 tons per day.

G. C. Reduction Works (1)—5-foot pans.

Imperial Rock Pt. (1)—7-foot tubs and settlers; (2) breaker, large size.

Phoenix No. 1 (1)—Eight tubs and Wheeler pans.

Pioneer (1)—15 tubs and Wheeler pans.

Sacramento (1)—12 7-foot iron pans.

Swansea (1)—6-foot tubs and one prospecting battery and pan.

Trench (1)—16 flat 7-foot pans, one excelsior and two Wheeler and Randall pans.

Weston's (Steam) (1)—Worked but about 1,000 tons of Comstock ore this year; about \$3 per ton.

Weston's (Water) (1)—Six flat-bottomed pans; has run but little this year for want of water.

ORMSBY COUNTY.

Merrimac (1)—Also, one prospecting battery and pan; (2) large.

Mexican (1)—Four furnaces and 10 barrels.

Avian (1)—Hanscom's.

WASHOE COUNTY.

Manhattan (1)—16 pans.

Ophir (1)—Working but 36 stamps—Freiberg process—nine furnaces.

Reduction Works—24 amalgamating barrels.

Temelec (1)—Large.

Washoe Valley (1)—Wheeler 12-foot breast; full capacity about 300 horse-power.

Reduction Works—40 stamps used for Freiberg process, and 20 for wet; eight furnaces and 20 barrels for dry process; four Wheeler and Randall's pans for wet; four more Valley pans to be introduced; (2) Blake's improved saw.

SOURCE: DRAFT INTERIM RPT OF THE
 QUARTZ MILLS OF GOLD HILL
 & AMERICAN FLAT, 10/7/92 SAC

are talking of putting out for Lemhi as soon as spring fairly opens.

OREGON.

From the *Oregonian*: We have a letter from Auburn which states that the new mines, 70 miles south of that place, are very extensive. Prospectors have struck a creek at a place where immigrants crossed it at an early day, and find considerable quantities of gold. One man took out \$600 in 13 days. It may be that this is one of the places where the immigrants, who came by "Meek's cut-off" discovered the gold of which everybody has heard so often.

Elk Creek Dist., in the John Day country, is one of the richest quartz mining localities in Oregon. Some of the rock from that district shows \$270 per ton of gold.

The *Umatilla Press* says that the Lawrence Bros. have discovered a silver lode on their ranch on Butter Creek, in this county. Ore therefrom has been sent to Portland for assay.

The *Jacksonville Sentinel* says the tunneling in Gold Hill is still progressing, with good prospects of success. The ledge has been struck again, and the miners are running a shaft from the tunnel to the surface—a distance of 120 ft.

MONTANA.

From the *Post* of March 30th: Hendry's mill cleaned up on last Saturday, from an eight day's run on Whitlatch Union ore, with 18 stamps, 324 ozs. of retort, valued at \$5,832.

Prof. Charles Rumley assayed some ore from the Copperopolis lode, Muscleshell Dist., which yielded 41½ per cent. pure copper.

Mr. Pfiel has organized a company in St. Joseph, Mo., with a capital of \$100,000 to put a mill on the Alameda lode. Mr. Isaacs, agent for a New York company, has also purchased two mills, one for the Summit Dist. and another to work on the Alameda.

The St. Louis and Montana smelting works yesterday cupelled the largest silver brick which has yet been produced. It is circular in form, 28 in. in diameter, 1½ in. thick, and weighs 120 lbs. This splendid piece of silver is the product of 7½ tons of ore from the Legal Tender lode. Notwithstanding the many adverse circumstances against which he had to contend, such as poor coal, the extreme cold, etc., Mr. Philip Deidesheimer has so altered and improved the works that they may now be pronounced a complete success.

Letter to same from Atlantic City, Lost Horse Gulch, says: That new camp—Eagle Gulch—is prospecting even better than at

NEVADA.

Esmeralda.

From the *Aurora Union* of April 6th: Over three tons of bullion from the Cornucopia mine, Partzwick, are lying in Wells, Fargo & Co's office, in this place, waiting for shipment. Over 150 lbs. of bullion from the Diana has been shipped within the past week and plenty more at the mine waiting transportation; also \$3,500 worth of bullion has been shipped from Aurora in the meantime.

Humboldt.

From the *Register* of April 6th: M. Torrey is progressing finely with his mining operations. He has one large furnace, superior to anything of the kind in the State, nearly completed, and is getting everything else in good shape. His mines in Arabia are turning out to be all he could hope. He has ore now piled up on his dumps of the value of \$80,000 at the lowest estimate. Yesterday he commenced hauling this ore to his reduction works.

Reese River.

From the *Reveille* of April 6th: Yesterday there were brought into town from the Knickerbocker mill, near Ione, 1,156 ozs. of bullion.

In the Reville Dist. prospects are reported flattering. Several owners of mines are engaged in getting out ore for the Rutland mill. The Crescent, Mediterranean and Atlantic, of the Reveille company, are yielding abundantly of ore that would work from \$100 to \$150 per ton.

Same of 8th: The Hopkins tunnel, which is to the rich belt through Lander Hill what the Suro tunnel is to the Comstock lode, is now in nearly 400 ft. It is the property of the Revenue Extension Co.

As wonderful as is the general character of the ore yielded by the Highbridge, it appears to improve and increase in richness as depth is attained. We were shown this morning a very beautiful specimen of mineral from the shaft of the Combination Co., at the depth of 170 ft. The piece is purplish black, and of remarkable gravity, and masses of it have returned \$10,000 of silver per ton. As rich as the mineral is, it is the predominant one in the Silver Bend and the Empire districts.

Same of 9th: Eleven bars of bullion were brought into town to-day from the mill of the Twin River Co.... Yesterday, 2,713 ozs. of crude bullion came in from the mill of the Social and Steptoe Co. at Egan Cañon.

The Keystone mill, which commenced running on Feb. 5th, continued without interruption for 50 days, during which time it reduced 543 tons of ore, yielding on an

that a considerable portion of it will work at the mill near \$5,000 per ton. A 40-stamp mill is to be erected at once.

The Rutland mill is 60 miles southeast of Belmont. It has five stamps of 600 lbs., and three of Wheeler's improved pans. It was to be set in motion on the 10th inst. Roasting furnaces are to be erected as soon as the weather becomes settled; meanwhile the wet crushing will be tried. The ore now on hand is from the Mediterranean, Crescent and Atlantic, and is estimated at an average of \$100 per ton. Some good ore has also been taken from the Mohaska ledge.

Washoe.

[In the Stock Circular, in another portion of this paper, will be found late mining news from this district.]

From the *Territorial Enterprise* of April 8th: Everything in the cañon below Gold Hill is lively. All the mills are pounding away on full supplies of ore. At this time, the price of reducing ore to within a certain per cent. of the assay is \$15 per ton.

Same of 9th: The new shaft of the Imperial and Empire companies, being worked conjointly, is now 850 ft. deep. New and substantial hoisting works of the most powerful description will be erected, the grading for which will commence in a day or two.

The amount for which Col. Buel's property changed hands, is variously estimated at from \$160,000 to \$300,000 in gold coin.

A body of very rich ore, five feet thick, was struck on Saturday last at the 500-ft. level of the Crown Point mine, in the front ledge. Considerable excitement was created by this new development, which promises to be an extensive one.

The Bowers and Plato has stopped hoisting ore for a few days, to put in a new reel, and make other improvements. When the works again start they will be able to hoist about 150 tons of ore every 24 hours.

From same of 12th: The new and powerful hoisting works of the Empire and Imperial will be in running order by Aug. 1st.

The eight-inch pump, running at the rate of eight strokes or revolutions per minute, is only able to keep the body of water recently struck in the Crown Point mine at a stand-still, and prevent its rising to the 500-ft. level, where the late rich strike of ore was made.

Same of 13th: The following is a statement of the amount of bullion shipped during the past week: From the office of Wells, Fargo & Co., in this city, there were shipped 4,847 lbs. of assayed bullion, valued at \$174,872.87; from their office in Gold Hill, 2,539 lbs., valued at \$69,761.61.

From the *Treasure* of April 9th: The ledge

on steadily.... In the Yellow Jacket, a drift west of the 500 ft. level has cut a streak of rich ore. About 200 tons are shipped daily. In the Overman but little work is being done, except to keep the mine free from water.

From the *Gold Hill News* of April 8th: As soon as the ledge is tapped in the Imperial mine we may look for active operations in all mines from the Bullion to the Yellow Jacket. As the great quantity of water with which they have to contend is what has caused them all to suspend operations in the lower levels, within the next four months there will be more known of the permanency of the Comstock ledge than has ever before been developed.

Same of 9th: The Cressus is preparing for a further development of its claim.

We paid a visit to the Crown Point yesterday. We saw a small pile of ore from the 500-ft. level, not the smallest piece of which but showed black sulphuret of silver; and in many specimens native silver was to be seen. Stock in all the claims in Lower Gold Hill has gone up in consequence of the strike.

Same of 10th: We saw this morning a small bar from Mount Blanc ore worked at Rigby's mill. The bar contained \$41.86—divided as follows: Gold, \$14.94; silver, \$26.92. The silver is .951 fine.

WASHINGTON.

The *Lewiston Journal* of March 22d says: We learn by a party just from the Sound, that new discoveries of rich silver quartz were made a few days since on the Slagit river, nearly opposite Port Townsend. The specimens show an abundance of free silver. The party who made the discovery is not anxious to have the facts known, but the news has leaked out, and caused quite a sensation in the towns on the Sound, and parties are daily leaving for the mines.

PURE AIR FOR MINES.—We understand that the first plunger air machine, where the air is first compressed on cold spring water, before entering the lungs, was erected at the Ophir mine, on the Comstock lode—greatly to the health of the miner and profit of the company—by Capt. Wm. Williams, a practical mining engineer, now of this city, whose card appears in another column. This machine forced into the mine 48,324 cubic feet of air to a six-foot stroke, and is so simple in construction as to require only one-half the power of one man to operate it.

T. T. FIED
FORUM,
by G. H. H.
Y. H. H. H.
OBLER.

New York.
Duck Crook.—The Crook still keeps on the even tenor of its way with a large troupe of melodious actors and actresses, introducing new features almost nightly. The place is devoted to fun and all is free and easy throughout. A duo bill will be presented this evening.
New Boilers.—The Yellow Jacket Company have just received and will at once set up two new boilers, each 16 feet in length by 54 inches in diameter. Each boiler contains 50 three-inch tubes. The boilers were manufactured at the Pioneer Boiler Works.
The omnibus line plying between this city and Gold Hill is being well patronized this summer. Our people all seem to have made up their minds that it is much cheaper to pay two bits for a ride than to walk during the hot weather.
Not So.—There was a report on the streets last evening that a miner in the Chollar-Potosi had been caved on and fatally injured. Upon tracing the matter up we found that a workman in the mine had sprained himself, so cave—no smashing of bones!
Overhauling.—The Kentuck Company are engaged in overhauling their hoisting works. They are putting in new reels, repairing their shafts, and pitting everything in order for a long siege of heavy work.
Low Fare.—The old line of Dayton stages leaving that town in the morning charges but four bits to this city and intermediate points. Nobody can complain of this as extortionate.
Our Markets are well supplied with Apples, peaches, plums, pears, grapes and every other kind of fruit now in season—watermelons and muskmelons are also plenty.
For Sunday Accommodation.—After this date the stage office of Wells, Fargo & Co. will be open on Sundays from 2 to 4 o'clock P. M. for the accommodation of those wishing to secure seats in the stages to California.
The Corro Gordo mines are still well spoken of. Parties who left this city a few weeks since to look after interests in various localities that section express themselves as being perfectly satisfied with their mines.
Famous teams, loaded with merchandise for our business houses, continue to throng our streets. Our merchants appear to be determined to take time by the forelock this season.
Telegraphing.—There are messages at the Telegraph office for the following persons: Mikal Kelly and C. Morales or Lottio Morales.
New Appointment.—Mr. A. Baker has been appointed route agent for the western division of the Overland Stage Company.
Large quantities of wood are now coming into the city from Washoe. Ton cords of one term is a load by no means unusual.
All our mills are now at work day and night, and we hear no complaint of a scarcity of wood.
Good Sport.—There is said to be very good shooting just now about Pearisno—the wild game grouse and sage hens.

Notice to Invalids.
ALL PERSONS WHO HAVE NO HOME NOR
place where they can receive the attention
necessary to their comfort, when ill, can find at
the County Hospital comfortable private rooms,
where they will be attended upon by kind and
experienced nurses, and be supplied with every
thing necessary to their comfort.
THE ROOMS are entirely separated from the
ward occupied by the indigent sick.
The Hospital is under the care of Dr. BRON-
SON, who can be found at his office, corner of C
and Taylor streets, over Fowler's store, every
day between the hours of 12 M and 3 P M. Ar-
rangements can also be made with Mr. Crouch,
Superintendent of the Hospital, who can always
be found at the Hospital Buildings.
Charges moderate.

NOTICE IN BANKRUPTCY.—THIS
is to give notice that on the thirteenth day of Au-
gust, 1887, a warrant in bankruptcy was issued
against the estate of JAMES H. FOLEY, of Washoe
City, in said district, who has been adjudged a bankrupt,
on his own petition; that the payment of any debts and
delivery of any property belonging to such bankrupt to
him, or for his use, and the transfer of any property by
him, are forbidden by law; that a meeting of the credi-
tors of the said bankrupt, to prove their debts and to
choose one or more assignees of his estate, will be held
at a Court of Bankruptcy, to be holden at the office of
Mr. J. REELEY, a Register in Bankruptcy of said Court,
No. 33 South C Street, in Virginia City, Storey County,
Nevada, before said Register, on the fourteenth day of
September, A. D. 1887, at 11 o'clock A. M.
U. R. Marshall and Messenger in Bankruptcy.

HAPPINESS OR MISERY?
THAT IS THE QUESTION.
THE PROPRIETORS OF THE "PACIFIC MU-
seum of Anatomy and Science" have deter-
mined, regardless of expense, TO GIVE FREE (for
the benefit of suffering humanity) four of their
most interesting and instructive Lectures on
Nervous, and its disqualifications: Nervous
Debility, Premature Decline of Manhood, Indi-
gestion, Weakness, Depression, Loss of Energy
and Vital Power, the Great Social Evil, and those
maladies that result from youthful follies, ex-
cesses of intemperance, or ignorance of Physiology
and Nature's Laws.
These invaluable Lectures have been the mean-
ing of enlightening and saving thousands, and will
be forwarded FREE on receipt of Twenty-five
Cents in postage stamps, on addressing "Secre-
tary Pacific Museum of Anatomy and Science,
Montgomery street, San Francisco."

ACCIDENT.—Day before
3 o'clock in the evening,
John Brown, an employe
of the mine, was found in
the old Chollar-Potosi
ed to go to the surface
in the afternoon, and was
en alive. He is supposed
istance of 250 feet, or from
the shaft is 480 feet deep.

opposition. The following is the result of
the election: For Chief Engineer: Hugh
Kerrin, 189; I. E. Brokaw, 91; Richard
Paddock, 121. Kerrin's majority over Pad-
dock, 68; over Brokaw, 98. For First As-
sistant, J. C. Wilcox, 400; for Second As-
sistant, S. D. Wright, 401. Last night after
the result was known there was a grand
blow out at the house of Young America No.
2, of which company Kerrin is a member.
Members from the various other companies
in the city were present. Speeches were
made and champagne flowed freely as water.

ABOUT WOOD—OUR PRICES TOO HIGH.—
We wish to inform our citizens that there is
no necessity for paying the price at present
asked in this city for wood—\$35 per cord
being asked yesterday. Mr. Blake, of Day-
ton, is now packing wood from that place to
the Petaluma Mill, Gold Hill, for \$18 per
cord—first-rate nut pine wood—and will
furnish the same in this city at \$25 per cord.
Ten dollars saved on a cord of wood is quite
an item. He will take orders for as little as
half a cord in one place. He has a train of
84 mules with which to bring the wood.
When wood can be had—and good wood—at
\$25, why pay \$35? If our Relief Committee,
or others, wish to purchase wood of Blake,
they can leave their orders with Mr. J. M.
Walker, of the Petaluma Mill, to be given to
Mr. Blake, as he is now filling an order
from the mill for fifty cords.

IN A BAD FIX.—Yesterday afternoon the
saddle horse of one of Hank Blanchard's
trains fell down, when just opposite the
Pacific Mill, in such a manner as to confine
the leg of the driver. He lay with his leg
fast under the animal, unable to move, until
assisted by some men who happened along
and dug the dirt and snow away from his
imprisoned limb. He was not in the least
injured, owing to the soft nature of the
ground on which the accident occurred—yet
he did not care about staying where he was
for more than half a day so, even if his
wages still went on the same.

OPHIR GRADE.—Men are at work clearing
the snow from the Ophir grade. A gentle-
man who came over it yesterday from
Washoe City informs us that the snow is in
many places over ten feet deep. The peo-
ple of Washoe City had had no mail com-
munication of any kind with the outside
world, for ten days, until day before yester-
day when a mail reached there from Carson
City. All are fat, hearty, virtuous and hap-
py in Washoe Valley.

WEAKENED.—Saturday night, a man who
was on a bit of a spree and feeling munifi-
cent as well as magnificent, took Miss
Maggie McCormick shopping and purchased
her numerous presents. On getting sober
he did not feel quite so generous, and had
Miss Maggie arrested for grand larceny.
When the case came up in the Recorder's
Court, however, the complaining witness
again weakened and withdrew his charge.
So the matter ended.

A RUNAWAY.—Two horses attached to the
express wagon of Charley Hacker, ran away
yesterday afternoon in Lower Gold Hill and
only stopped when brought up by coming
into collision with a quartz wagon. The
tongue of the express wagon was broken,
and the teamer, with which the wagon

ulations which they are unwilling to adopt. If
left to themselves the slaves would not have
asked for the privilege of voting. A vast majority
of them have no idea of what it means. This
bill not only thrusts the ball into their hands,
but compels them, as well as the whites, to use it
in a particular way. If they do not form a Con-
stitution with prescribed articles, and afterwards
elect a Legislature which will act upon certain
measures in a prescribed way, neither blacks nor
whites can be relieved from the oppression which
the bill imposes upon them. Without pausing to
consider the policy or impolicy of Africanizing
the southern part of our territory, I would sim-
ply ask the attention of Congress to that mani-
fest, well-known, universally acknowledged rule
of constitutional law which declares that the
Federal Government has no jurisdiction, author-
ity or power to regulate such subjects for any
State. To take right of suffrage out of the hands
of white people and put it into the hands of
negroes, is an arbitrary violation of this princi-
ple. This bill imposes martial law at once, and
its operation will be begun so soon as a General
and his troops can be placed there. The alterna-
tive between its harsh rules and compliance with
the terms of this measure is not suspended, nor
are the people afforded any time for full delib-
eration. The bill says to them: Take martial
law first, then deliberate; and when they have
done all that this measure requires them to do,
other conditions and contingencies, over which
they have no control, yet remain to be fulfilled.

**Passage of the Reconstruction Bill over
the President's Veto—Other Important
Bills Passed or Approved.**

WASHINGTON, March 3.
The veto of the Reconstruction bill was consid-
ered in the Senate to-night from 7 to 11 o'clock,
when a vote was taken, which resulted 38 to 10,
and Mr. Foster declared it a law without the sig-
nature of the President.

The veto of the bill regulating the President's
power of appointment and removal (the Tenure
of Office bill) was considered in the House, and
the bill passed over the veto—121 to 37.

The tariff bill which passed the Senate to-day
is the same as the Wool and Woollen bill passed
by the House two days before the close of last
session. No action is required on it by the
House, and the bill will be laid before the Pres-
ident for approval to-morrow.

Specials to the New York Press.

NEW YORK, March 4.
The Herald's Mexican correspondence says
Miramon recently informed a gentleman that the
Southern Confederates were yet hand in hand
with the Imperialists, and that General Min-
dano was corresponding with them in the hopes that
the two defunct establishments might so work
together as to make both a success.

The Times' special says it is understood that
commission to raise and report a new Tariff bill
next winter will be appointed at the first session
of next Congress.

The Maryland Legislature will to-day elect a
United States Senator in place of Gov. Swann.
The choice is between Ex-Governor Francis
Thomas and Hon. E. B. Jones.

The President will sign the Bankrupt bill when
it reaches him.

The Tribune's special says that after much op-
position in Executive session the nomination of
Gen. Dix as minister to France was confirmed by
over two-thirds of the Senators present. Cow-
an's nomination was so fiercely assailed that
Buckalew was forced to move it be tabled.

Washington Agents.

WASHINGTON, March 3.
The bill granting lands to aid the construction
of a railroad from Stockton to Copperopolis, Cal.,
was passed by both branches of Congress to-day.

WASHINGTON, March 4.
The President has approved the Bankrupt bill;
also the bill to make valid proclamations of the
President, thus exempting military officers and
soldiers from the operations of the Court. All
important appropriation bills and all other bills
presented to the President, including the Wool
Tariff bill, have been approved and signed by

Guard return thanks to the citizens of Virginia
and Gold Hill for the generous support received
at their recent benefit, the results of which have
freed the company from debt.
Resolved, That the Company acknowledge the
receipt of a pair of gold cuff buttons from C. G.
Batterman of the Crown Point mine, and from L.
Elkner of "one pair best custom made pantaloons,"
to be awarded as prizes at the target excursion of
the Guard, and thank them therefor.
Resolved, That copies of these resolutions be
furnished the *Enterprise*, *Trepan* and *News*,
with a request for their publication.

SOUTHERN RELIEF.—The following letter
explains itself:

SAN FRANCISCO, May 16, 1867.
J. H. Latham, Esq., Treasurer of Southern Re-
lief Committee, Storey County, Nevada.—Dear
Sir: This second generous contribution from
the citizens of Storey County, Nevada, amounting
to three thousand one hundred and ninety-four
dollars, is another assurance that sympathy for
suffering humanity has an abiding place in their
hearts. We shall, as before, transfer it by tele-
graph to the Southern-Famine Relief Commission
of New York, who, without doubt, will act in ac-
cordance with our request, made this day by tele-
gram: "Please distribute quickly and judi-
cially, to relieve our suffering countrymen at the
South. Accept for myself and others who
have subscribed so liberally to this fund, the
cordial thanks of the committee. Very respect-
fully, yours, etc., THOS. H. SELBY,
Chairman and Treasurer of Southern F. R. Com.
of San Francisco.

GRAND BALL IN SILVER CITY.—The Shields
Circle of the Fenian Brotherhood will give
a grand ball at Armory Hall, Silver City,
Friday evening, June 7, in aid of the dead-
tute families of Fenian prisoners in Ire-
land. Dan Lyons of this city will furnish
the music on the occasion. The balls of the
Silverites are always of an eminently
social character, and all who attend this one
will pass a most agreeable evening. The
roads are now in fine condition for buggies,
and it is a very pleasant drive to Silver City,
therefore we presume many Fenians and
others of this city will attend the ball, es-
pecially as its object is a good and most
charitable one.

EXERCISE AND REFRESHMENTS.—At Cun-
ningham & Daley's saloon, No. 43 South C
street, lovers of the noble game of billiards
will find three of Phelan's combination
billiard tables, balls new and true and the
best cues in the city. When wearied with
playing you will find refreshments at hand
—fresh oysters in every style, wines, brand-
ies, whiskies and all other liquors of the
best brands; also cigars that are cigars.
The Bank of California is only three doors
north of Cunningham & Daley's, and can
easily be found by bearing this fact in mind.

EARLY SLIDES.—Several pretty heavy
slides of earth and rock have lately oc-
curred on the Devil's Gate Toll Road, oppo-
site the Pacific Mill, at a point where work-
men were engaged in widening the track.
Several thousand tons in all have slid down.
All the better, once it is removed. The
road has always been inconveniently narrow
in that vicinity. The proprietors of the road
are doing an unusual amount of work on it
this season; which is but right. From Gold
Hill to Silver City the road ought to be as
thoroughly macadamized as in C street in
this city. There is no lack of drainage fa-
cilities.

THE BRICK BUSINESS.—Mr. Callaghan has
sold his entire interest in the brick business
heretofore carried on by him near the Di-
vide. Cox & Brown of the Truckee stable
are the purchasers, and will supply bricks
to all in need of them. We believe Callag-
han will still have charge of the yard, that
is of the manufacturing department. This
trade is not so good as it was at the time we
were building our city; yet, even now that
it is finished and fenced in, there is a fair
demand for brick for furnaces, chimneys,
etc.

CHARLES ASHLEY BRYANT.—The mother
of Charles Bryant, who resides at Lake
Providence, Louisiana, wishes to learn the
whereabouts of said son, who crossed the

assistance and co-operation. The proceeds of
pieces of the country are deemed of the highest
importance to the Republicans. Every State is
requested immediately to organize for remaining
elections and by preparing for the coming Presi-
dential contest, and especially in States which
never before recognized, as the only just basis of
Government, the equal and inalienable rights
of man. They agree to prosecute a systematic
and thorough canvass of the Southern States by
efficient speakers of both races and friends of
their efforts. They will also distribute docu-
ments maintaining the principles, policy and claims
of the Republican party, and for this purpose
appeal for aid directly and personally to the
party, asking the rich to give what they can
afford. All letters and contributions should be
addressed to Governor Marcus L. Ward, Chair-
man and Treasurer, Newark, New Jersey.

Supreme Court Decision.
New York, May 16.
In the Supreme Court, the United States vs.
Dopoli, the decision was that a mandamus should
issue to compel the allowance of an appeal from
the Southern District of California, respecting
land in California.

California Flour.
New York, May 16.
Flour closed dull. California, 300 lbs gold at
\$16.00; 100 lbs gold at \$16.00.

**The Opinion of the Attorney General on
the Military Reconstruction Act.**
Washington, May 16.
The opinion of Attorney General Stanberry on
the Reconstruction Act is expected to be ready
for promulgation this week, all points being
decided on and approved by the President and
Cabinet. The utmost pains have been taken to
render it clear beyond doubt. The meaning of
the various branches of those Acts in the prepa-
ration of the document involved the examination
of the laws of the Southern States, in order to
understand precisely what classes of persons
were affected by Congressional action, and to
afford a guide by which this may be carried into
execution with the least possible degree of em-
barrassment to all parties concerned.

Crash of a Building and Loss of Life.
Buffalo, May 16.
The building of the Union Iron Works, in pro-
cess of erection, fell in this afternoon, crushing
five persons to death and seriously injuring four-
teen others; some of it is feared fatally.

Fire in New York.—Jeff. Davis in New
York City.—He Has Few Visitors, etc.

New York, May 16.
A fire occurred at 44 South street this morning.
Loss, \$125,000. Williams & Guggen loss \$35,000
in silver goods; Howland & Aspinwall, in raw
silks, \$32,000. The building is almost a total loss.
Sale & Co. had in store nine hundred chests of
tea valued at \$85,000.
Jeff. Davis remained quietly at the New York
Hotel to-day. Few people called on him. It is
believed he will to-night go to the residence of
Charles O'Connor, at Washington Heights, and to-
morrow night continue his journey to Canada.
The twentieth session of the American Insti-
tute of Homoeopathy will be held in this city on
the 6th of June. The annual address will be de-
livered by Dr. Cooke of Chicago.

Shipping News.—California Passengers
for Europe—Hides—International
Board of Arbitration.

New York, May 16.
The ship El Dorado has arrived from Boston to
load with coal for San Francisco for the service of
the Mail Company.
Passengers for Europe by the steamer Union:
O. Kneels, B. Bauvaux and family, Mr. and Mrs.
J. Wolf of San Francisco.
The stock of hides is held firmly; dry Califor-
nia, \$18@19, gold; salted, \$10.50@11; dry, salted,
clear, \$12.
It is evident that the International Board of
Arbitration, in the case of the Hudson Bay Com-
pany's claims against the United States for forts,
trading posts, etc., in our Northwestern Terri-
tories, will be unable to agree, and that the dispute
will have to be settled by Judge Curtis of Boston,
who is umpire.
The cargo of wheat and copper ore of the ship
Dashing Wave, sunk near Sandy Hook, is being
brought to the city. The vessel is not injured
and will come to the city in good condition.
The bark Hans, from San Francisco, arrived at
Cork to-day.

Michigan Constitutional Convention.
DETROIT, May 16.
In the Constitutional Convention to-day consid-
erable progress was made in the appointment of
committees. Temperance delegates expect to
secure a clause in the Constitution prohibiting
the manufacture and sale of spirituous liquors.

From Fort Buford.—The Reported Cap-
ture of the Steamer Miner Con-
firmed.

the entire day points to his opponent. Jamison's
against 140 points to his opponent. Jamison's
game was one of the most brilliant ever witnessed
on this coast. At the conclusion of this game
Jamison played Reading and beat him 65 points
in 500. Jamison has now vanquished all except
Mott, with whom he plays this evening. If he
wins this game the champion cue is his. This
evening a friendly game of 1,500 points will be
played between Jamison and Little, the latter be-
ing the champion player of California and pos-
sibly the original champion cue, to which he
is entitled, having held it for over two years.
Subsequent to the contest Little beat Phelan at
Platt's Hall, a few years since, and a fine game is
anticipated this evening.

The Pacific Mail steamship *Montana* called for
Panama to-day with about 890 passengers and
\$524,655 in treasure.

A dispatch from Warm Springs announces the
death at that place, this morning, of James W.
Stephenson, a prominent lawyer of this city. His
disease was consumption.

The Internal Revenue officers yesterday seized
a still with a capacity of 25 gallons on Howard
street, near First, for illicit distilling.

Captain J. L. Worden, hero of the monitor
Merrimack, sailed on the *Montana*, to-day, for
New York. Reverend J. E. Dwinelle, of Sacra-
mento, was also a passenger.

Patrick Brown, a laborer, yesterday, while at
work excavating near the corner of Brannan and
Third streets, was buried under the earth. He
was exhumed and conveyed to his residence, and
a physician summoned, who, upon examination,
found his head and breast fearfully lacerated,
with a fracture of the right thigh bone, besides
contusions on various portions of the body. He
was comfortable up to a late hour last night, and
in a fair way to recover.

The eighth anniversary of the Industrial School
is being held to-day. J. W. Winans, President
of the Board of Education, delivered an address.

Wm. Taylor was arrested yesterday as a
deserter from the United States army. The
offense was committed in the Eastern States,
where he was found guilty of bounty jumping no
less than twenty times.

The Western Union Telegraph Company's ship
Nightingale sails for Kanagawa, Japan, on Mon-
day next, and on her return will bring back the
operators, employees, and property of the com-
pany now in Russian America and the Arctic
regions. The building of the Russian Overland
Telegraph is being suspended.

It rained lightly last night. Cloudy and cold
to-day.

There are no later gold quotations than those
of yesterday—137 1/4.

Legal tenders are without change—7 1/4 buying
and 74 selling.

Markets.

Flour.—The shipment to New York by the
Panama steamer this morning consists of 8,499 1/2
bushels, valued at \$20,498; small sales of Santa
Clara extra in wood at \$7.50, and in gunnies at
\$7.25, both free on board. The market is still
firm. We quote local mills as follows, with a
good demand: Superfine half sacks, per 100
lbs., \$5.50@5.75; quarter sacks, \$5.75@6.00;
extra half sacks, \$6.00@6.25; quarter sacks, \$6.25
@6.50.

Wheat.—Sales include 250 sacks inferior Coast,
\$1.70; 150 sacks do, \$1.80; 160 sacks fair milling,
\$1.90; 160 sacks good, \$2; 1,000 sacks choice
shipping, \$2; 750 sacks do, \$2.12 1/2; 1,000 sacks
do, \$2.12 1/2, per 100 pounds.

Barley.—The demand is fair at 82 1/2@87 1/2 cents
per 100 pounds.
Oats.—650 sacks good, in two lots, \$1.10 per
100 pounds.

Potatoes.—Old sold at 70c. @ \$1.25, and new at
\$2.25 @ 2.75 per 100 pounds.
Apples.—200 boxes Oregon, ex Montana, sold
within the range of \$2.50 @ 3.75 per box.

(SECOND DISPATCH)

Jamison Wins the Golden Cue—Fire.

SAN FRANCISCO, May 16—10 P. M.
Jamison won the golden cue this evening
beating his last opponent quite easily. In all his
matches so far he has played splendidly and with
unusual ease. There is a very large
attendance at Congress Hall to-night to witness the
game of 1,500 points between Jamison and Little.
The game will not be terminated until late. Odds
are offered in favor of Jamison.

A fire broke out at 9 o'clock in J. Pierce & Co.
large furniture warehouses on California street.
The fire caught in the paint shop and spread ra-
pidly throughout the building. The damage
very heavy. The entire portion of the build-
ing and a large amount of furniture are destroyed.

FROM PETALUMA.
(SPECIAL DISPATCH TO THE ENTERPRISE.)

Fire at Petaluma.—An Organized Bar
of Incendiaries There.

PETALUMA, May 16.
For the third time this week our citizens
at night at about 11 o'clock were aroused by the
of fire. It broke out in an unoccupied dwelling
the rear of Sixth street, owned by C. A. Hall,
and being thickly surrounded by other dwell-
ing

1871 & 1872

DEVIL'S GATE DISTRICT

Is situated in Gold Cañon. Silver City is about its central point. Mines here were worked several years ago, but for a long time were idle, and some of them abandoned. Work, however, has resumed here lately, and the prospects of this district never more encouraging than the present.

DAYTON.

This mine is located in Silver City, on the south side of the river. The old works on this mine are a tunnel, in which a shaft was sunk to a depth of one hundred feet. A new shaft has been started, which has reached a depth of one hundred feet. New steam hoisting works are to be erected in the Spring. Ore from this mine is extracted in sufficient quantity to keep the Atlanta Mill—ten stamps—constantly running. This is one of the earliest locations in the district. Nothing was done on it for a number of years. During the past Summer work was resumed—works cleaned out, and a new shaft commenced.

BUCKEYE.

This mine is located one mile east of Silver City, in Long's Ravine. It is also one of the old locations. Steam hoisting works have been erected here, but everything was abandoned, and nothing done for a long time. Two years ago work was resumed, and new steam hoisting works erected. An incline is down a distance of six hundred feet. Two stamps, Horn and Hope, each ten-stamp, are supplied with ore from this mine. Water in considerable quantities is found, requiring an eight-inch pipe to keep the mine clear. This water is carried by flumes around to Silver City, and supplies the Bacon and Trench Mills.

COOK & GEYER.

This mine is located about three quarters of a mile north of Silver City. A great amount of work was done on it last Summer, and it has been kept the Franklin Mill running. It has been idle for the last three months, but work will soon be resumed again.

DANEY.

This mine has been abandoned. Some good ore was here near the surface, and worked out years ago. Since that time hundreds of thousands of dollars have been expended in prospecting for other bodies of ore, but nothing of any consequence has been found. Work has stopped and renewed again several times. During the excitement of the Spring the owners were again inspired with the hope of finding something in this mine, but after several months of work they have given up and will remove the hoisting works and other material of value.

necessary to sink several hundred feet further to obtain the same result. Powerful hoisting works have been erected at each one of the shafts. In No. 2 a large amount of water has been encountered. When pumps are allowed to stop it rises to within three hundred feet of the surface. A large machine shop has been erected at Sutro for the manufacture of all the machinery to be used by the company. There is here a store supplied with everything necessary for use at the different works. These are issued as they are needed. The formations through which the tunnel has passed so far, are: for the first seven hundred and fifty feet, conglomerate; then trachyte three hundred and eighty feet; after this a belt of clay one hundred and fifty feet; and then comes one thousand seven hundred and fifty feet of porphyry; then three hundred and ten feet of trachyte. It is calculated that the tunnel will be completed to the Comstock lode in from two to two and a half years from the present time, providing no unlooked for obstacles be met with in the prosecution of the work.

MILLS.

The following list of quartz and tailing mills was made by Mr. George Padden, County Assessor:

Name.	Situation.	Capacity, tons.	Stamps.	Condition.
Devil's Gate.....	Silver City.....	24	12	running

WASHOE COUNTY.

This county is north of Ormsby. It takes its name from a tribe of Indians who inhabit the western portion of the State. A few mining districts have been organized within its boundaries, at different times, but none of them have ever been a source of much profit. The wealth of this county consists chiefly in its agricultural resources and timber lands. Formerly, the streams of water flowing from the cañons in the Sierras into Washoe Valley were made available for milling purposes, in reducing the ores from the Comstock; and at one time no less than ten mills, having an aggregate of two hundred and eighty-one stamps, were in active operation in this county—some of these, moreover, were of the largest size, and first-class in all their appliances. The Ophir Company's mill, of seventy stamps capacity, and built at a cost of a half million dollars, and Dall's Mill at Franktown, having sixty stamps, were among

the first mills in the State. Since the completion of the Truckee Railroad, however, ore can be delivered so much cheaper to the mills on the Carson River, that with the exception of the Truckee Mill, near Reno, and one or two tailing mills in Washoe Valley, nearly all these mills have been dismantled and abandoned.

RENO

Is the county seat, and is situated on the line of the Central Pacific Railroad. From this point all supplies used in the southwestern section of the State are forwarded, as well as to Douglas, Ormsby, Lyon, and Storey Counties. It is pleasantly located on the banks of the Truckee River and has many natural advantages for maintaining itself as a prosperous town.

WADSWORTH

Is situated thirty-five miles further east, on the line of the railroad. There are located here the repair and machine shops for the Truckee division of the Central Pacific Railroad. From this point freight shipped to Belmont, Ellsworth, and Columbus; and all the soda and borax obtained in Churchill and Esmeralda Counties are forwarded to this place for shipment to the markets.

WASHOE CITY.

Formerly the county seat, Ophir, and Franktown, since the decline of milling enterprises in this county, are not so flourishing as they were some years ago.

The following interesting description of the agricultural and other resources of this county has been condensed from the columns of the *Nevada State Journal*, a well edited weekly newspaper published at Reno.

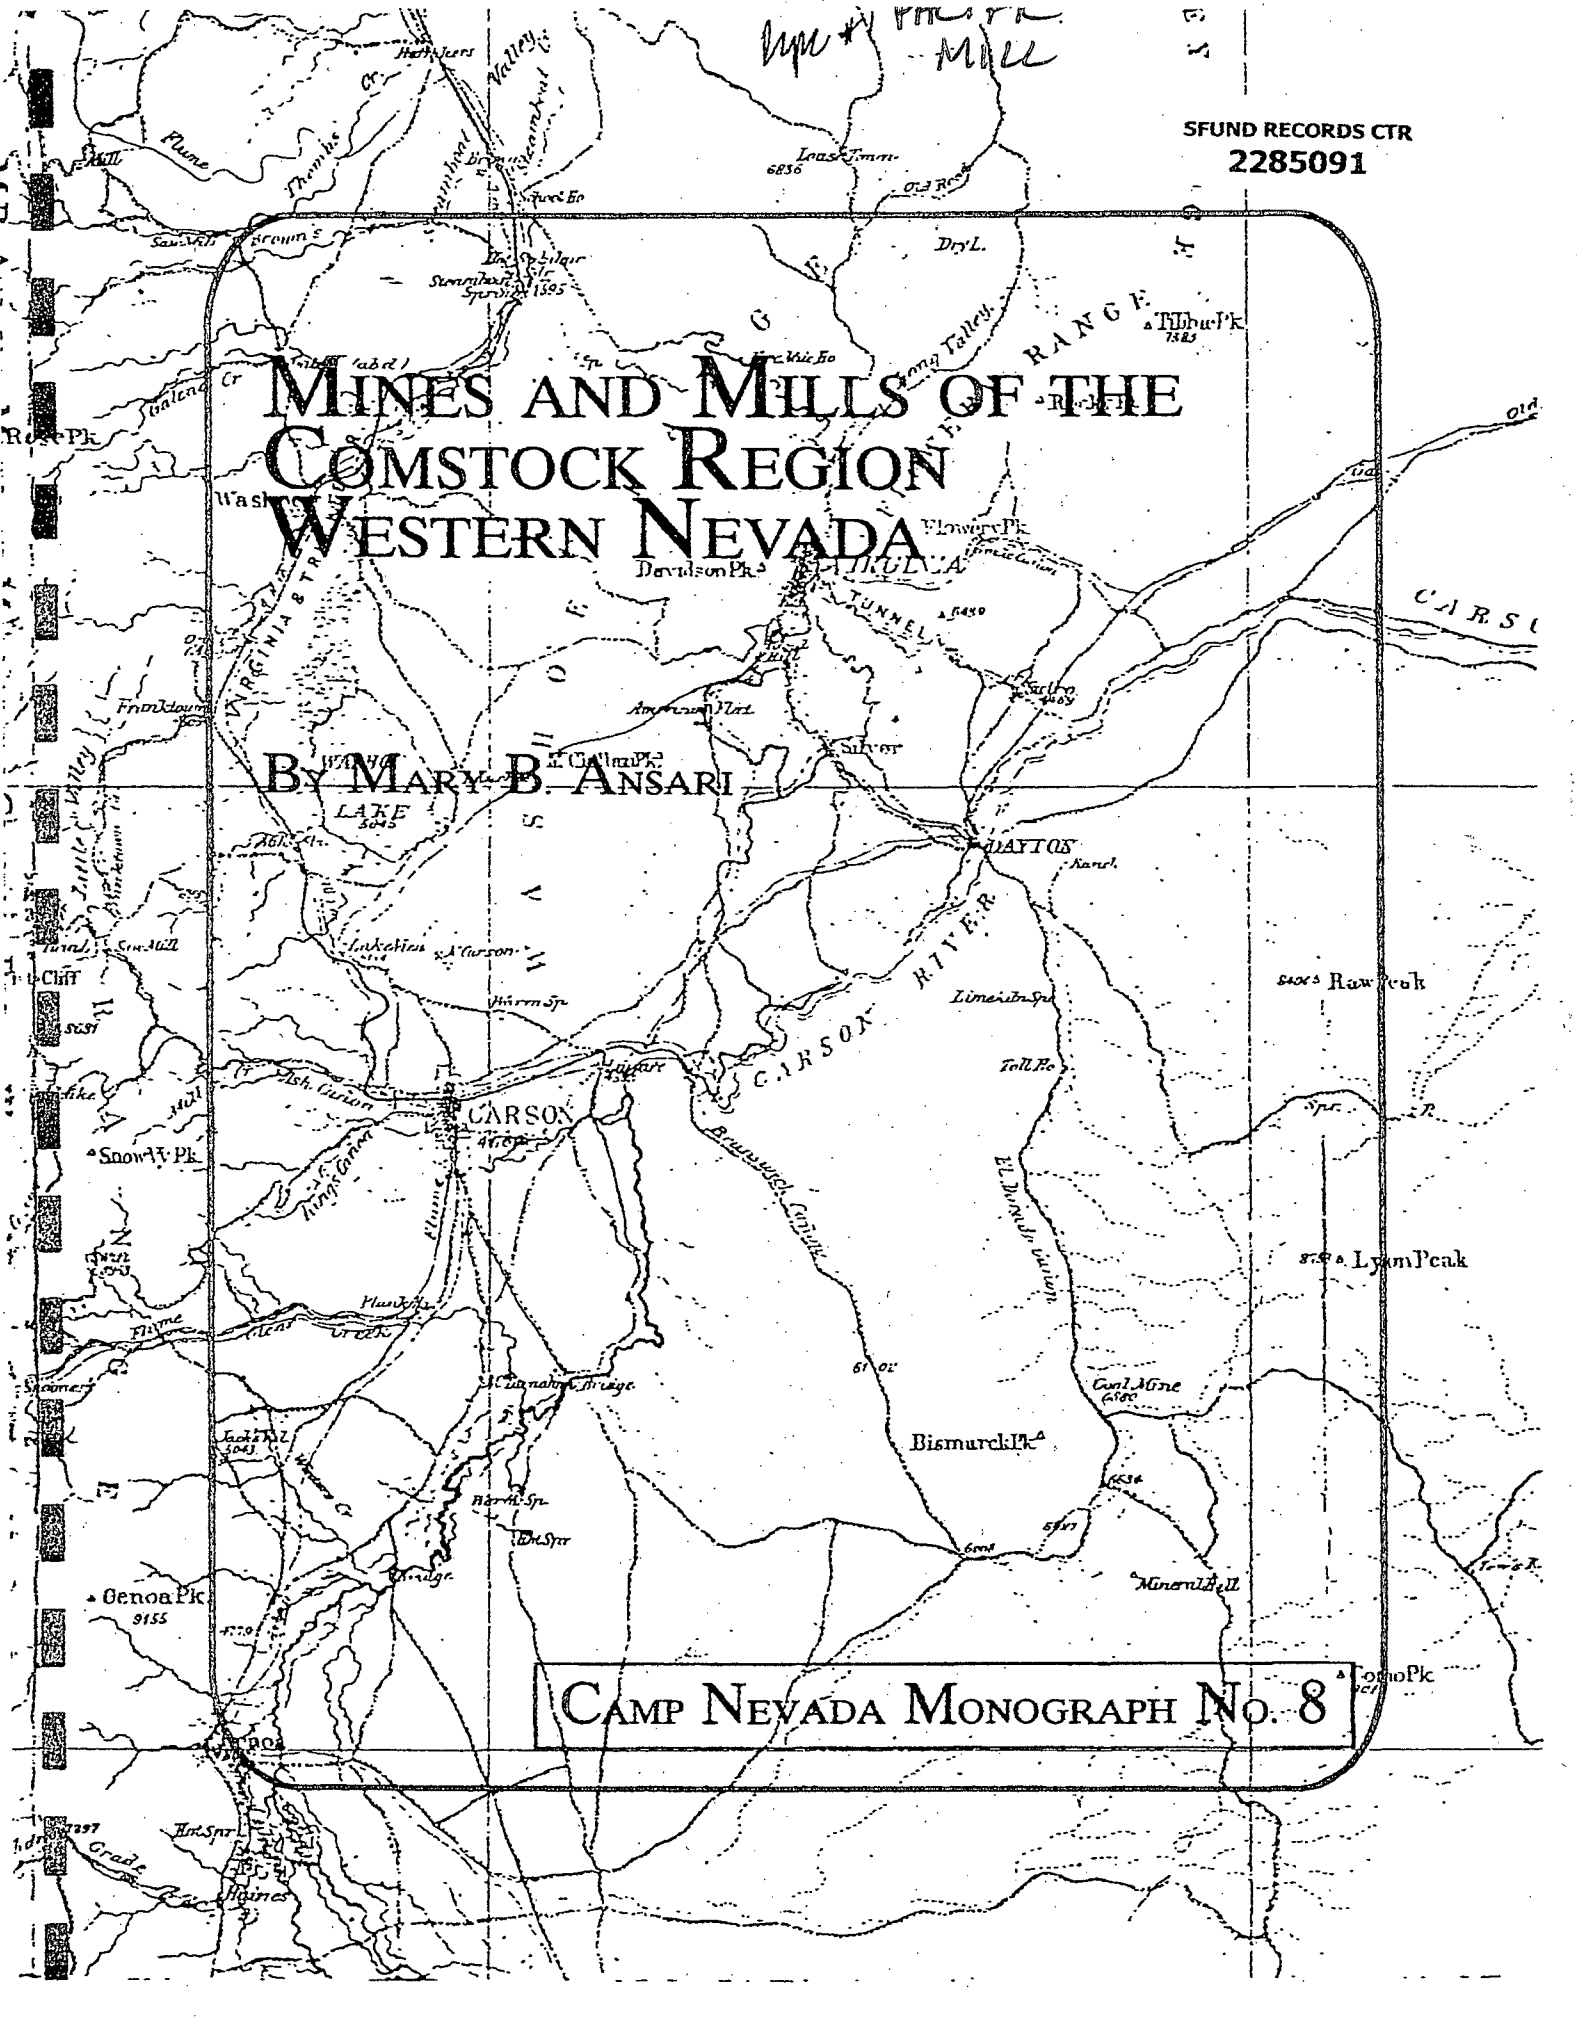

It may be said that Washoe County embraces an area of one thousand and five hundred square miles and that of this extent not less than eight hundred to one thousand square miles will ultimately be found valuable for agricultural and grazing purposes. We think, however, that within proper bounds of truth, for, in fact, it is difficult to say what noticeable portion of the entire county is not to a greater or less extent fit for grazing. Of the fine arable land (by which we mean land so situated, of proper richness, that crops may be raised by irrigation) we think that there are between three hundred and four hundred square miles. Notwithstanding the rather extensive reclamation and cultivation of lands in Washoe Valley and Truckee Meadows, we do not believe that one fourth of our arable lands have been yet tested for anything like their reasonable capacity for farming operations. The surface of the county alternates in mountain range, valley, hill, and lake. The eastern range of the Sierra Nevada Mountains were years ago clothed from valley to summit with forests of excellent timber. Since then, great inroads have been made among these forests for the procuring of lumber, mining timber, and wood, but enough yet remains in the southwestern portion of the county to form an extensive source of supply for the same purposes, and all accessible labor and capital. The extreme southwest corner of the county is found within the limits of the remarkable and beautiful Lake Tahoe.

MINES AND MILLS OF THE COMSTOCK REGION WESTERN NEVADA

BY MARY B. ANSARI

CAMP NEVADA MONOGRAPH No. 8

Papoose Mill: Small quartz mill located adjacent to the Piute Mill in Gold Canyon below Gold Hill. In the 1871-72 *State Mineralogist's Report* it was listed a 5-stamp mill with a 14-ton-a-day capacity (Parkinson, 1874, map; SMR, 1871-72, 138).

Marysville Mill: Was built in 1861 about 3/4 mile below Gold Hill. According to Kelly's 1862 directory, its main building measured 55 x 70 feet, and it had 18 stamps with a 36-ton-per-day capacity. In 1865 it was described as having 9 stamps, 30 pans, a 35 horsepower engine consuming 4 cords of wood a day, a capacity of 20 tons a day, and 12 employees. The 1866 *State Mineralogist's Report* lists its capacity as 18 tons per day (Collins, 1864-65, 249; Kelly, 1862, 171; GHN, 1865, June 27, 3:2; SMR, 1866, 148).

Pacific Mill: Large milling establishment located in Gold Canyon approximately 3/4 mile northwest of Devils Gate, which was built in 1864 by Land, Skae, & Co. In 1865 the *Gold Hill News* reported its main building to measure 72 x 100 feet. At that time it had a 120 horsepower engine consuming 9 cords of wood per day, 30 stamps, 15 Wheeler pans, a 50-ton-per-day capacity, and 20 employees, making it the largest mill in the district. In the early 1870s it was milling Belcher Mine ore and was listed as having 30 stamps with a capacity of 70 tons a day. According to Myron Angel, in 1875 the mill was owned by the Union Mill & Mining Co., of which William Sharon was president (Angel, 1881, 594; GHN, 1865, Jan. 12, 3:1; 1865, June 27, 3:3; Lord, 1883, pl. 3; SMR, 1871-72, 138).

Bancroft's 1862 map showed the McClellan and Staples mills as being located in Gold Hill. No other information was found on these mills. Among some of the smaller mills located in Gold Canyon below Gold Hill were the Greeley & Co., the Ione, and the Pony mills. In 1873 the *Territorial Enterprise* reported the Greeley & Co. Mill to be a new tailings mill situated in lower Gold Hill. At that time it had one pan and processed 36 tons of tailings a day. First mention of the Ione Mill was found in the *Territorial Enterprise* in 1869 when the facility was reported to be located in lower Gold Hill and to have been purchased by the owners of the Twin Mine to process ore from that mine. In the 1871-72 *State Mineralogist's Report* it was listed as a 5-stamp mill running on ore from the Crown Point Mine and having a capacity of 15 tons a day. In 1875 the *Territorial Enterprise* described the Pony Mill as located in lower Gold Hill and having a capacity of 3 tons in 24 hours. The article went on to say that the facility was a place where the small operator could get ore speedily and honestly processed (TE, 1869, Mar. 2, 3:2; 1873, June 8, 3:2; 1875, Mar. 14, 3:1).

of the first part of the lease have described premises and in part and parcel the same to the applicants, to have and to hold all and singular the above mentioned and described premises to and between the two applicants unto the said party of the second part his heirs and assigns forever, in testimony whereof the said party of the first part has hereunto set his hand and seal the day and year first above written.

[illegible]

15th East. Also a like interest in the steam quartz crushing mill situated upon said tract known as the "Pacific Mill" and all the machinery therein situated also that certain tract piece or parcel of land whereon is erected the "Franklin Quartz Mill" in Tye County State of Nevada situated about one half mile up the river on South boundary from the O'Brien mill and about two miles south westerly from the town of Dayton in said County. Also the said Franklin Quartz Mill and the machinery therein and the water water power and privileges claimed and used thereunder and the road leading thereto. Seventh Also an undivided one fourth (1/4) interest of and in that certain tract piece or parcel of land lying, situate and being upon the Carson River in the County of Humboldt State of Nevada and description the United States Survey as follows to wit the east half (1/2) of the South West quarter (1/4) and the west half (1/2) of the South East quarter (1/4) and the South East quarter (1/4) of the North West quarter (1/4) of Section number twenty (20) in Township number thirty (30) North of Range number twenty (20) East and containing thirty hundred (3000) acres of land. Also a like interest in and to the quartz crushing mill situated upon said premises and known as the "Pomona Mill" and the machinery therein and in and to all the ditches, water rights, privileges and franchises pertaining thereto and all roads and rights of way pertaining to said premises leading thereto or claimed thereto. Eighth Also all that certain piece or parcel of land and tract situate in the Town of Gold Hill in Tye County State of Nevada described as follows to wit: fronting one hundred and fifty (150) feet on the east side of Main street in said town by the depth contained of one hundred (100) feet to a fence enclosing the eastern side of said lot bounded on the west by Main street East by the fence of premises North by land of George South by land of Miller and being the same premises whereon are situated the "Henderson" formerly known as the "Dillon Mill" now known as the "Henderson Mill". Also the steam quartz crushing mill known as the "Henderson Mill" and all the machinery therein. Ninth Also an undivided one half (1/2) interest in and to that certain tract of land situate in the County of Tye State of Nevada lying on the border east of the City of Virginia in six miles from the town of Dayton. The mill situate upon a tract the "Compton State Mill" and all the land thereto adjacent and aggregated as part of the mill property lying about seven (7) acres (1/2) more or less and being the interest in and to the said Compton State Mill and the machinery therein. Tenth Also an undivided one half (1/2) interest in and to that certain tract piece or parcel of land and mill property situate lying and being in the Town of Gold Hill in Tye County State of Nevada described as follows to wit: fronting one hundred (100) feet on the south side of Main street in said town by the depth contained of one hundred (100) feet to a fence enclosing the eastern side of said lot bounded on the west by Main street East by the fence of premises North by land of George South by land of Miller and being the same premises whereon are situated the "Henderson" formerly known as the "Dillon Mill" now known as the "Henderson Mill". Also the steam quartz crushing mill known as the "Henderson Mill" and all the machinery therein.

Then running thence Southward along the east line of said
 street three hundred and thirty nine and one half (239 1/2) feet to
 the Nevada Hotel lot thence at right angles easterly two hun-
 dred and twenty five (225) feet onto or less tract heretofore
 and parallel with the line of said street three hundred and thirty
 nine and one half (239 1/2) feet thence at right angles easterly 2
 hundred and twenty five (225) feet to the place of beginning
 Also a like interest in and to the steam quartz crushing mill
 thereon erected known as the Geliduma Mill and the machinery
 therein. Also all that certain tract piece or parcel
 and situate lying and being about one mile below or south-
 uly from the town of Silver City County of Oregon State of New
 Mexico being seven hundred (700) feet in length and three hundred
 (300) feet in width and being the same tract which was located
 by E. W. Dunn, John F. Tregloam, W. H. Long, Samuel M. John,
 H. F. Goodrich, James Hatcherman and J. J. Williams and was
 surveyed for said parties by Edward E. Fine Deputy County Sur-
 veyor of Carson County on November 1st 1861. As which survey
 was Recorded in Book of Contracts Kings Records Carson
 County then Territory of Nevada pages 159 & 160 on November
 6th 1861. The said tract being the same as person or persons erected
 the quartz crushing mill known as the Swansea Mill
 Also the Swansea Mill and all the machinery thereon. Also
 Also an undivided two fifths (2/5) interest in and to all that certain
 piece or parcel of land situate in Pleasant Valley in Trachoe County
 State of Nevada Bounded and described as follows to wit:
 Commencing at a stake at the North East corner of the enclosure
 of George Smith on the line of the public road and running
 thence south with the line of said road and a board fence
 and the length of said board fence to the commencement of
 a pole fence and stake thence easterly over the valley and
 valley creek up the side of the hill to a stake between later from
 ironed stones thence north on the side of the hill to the termination
 of a line fence between said Smith and his own lands and a stake
 thence west with said line fence to the place of beginning contain-
 ing about thirty (30) acres or less also the usual privilege
 of said creek to said land belonging which includes those in
 said Smith's lot also continues up the creek above the Smith
 line so as to obtain thirty five (35) feet perpendicular fall of
 water. Also a like interest in the quartz crushing mill thereon
 situate known as the Swansea Mill and all the machinery
 thereon. Together with all and singular the improvements hereon
 and the right of privilege of said creek and appurtenances there-
 unto belonging with and unto the land. The remainder
 and damaged the same and persons and animals and
 grades thereof. Also all the water in the hills and
 property possession claim and demand in that respect in all
 in law or equity of the said parties of the said parties of and
 to the said parties of the said parties of the said parties of

do here and to hold the above mentioned and described
lots given and parcels of land mill sites and mill proper-
ty and every part thereof with the appurtenances unto the party
of the second part its successors and assigns forever
and the parties thereof the party of the first part has here-
unto set his hand and seal the day and year first above
written
